

Community radio is an asset to this community and Low Power FM radion is the only way to replicate that in other places. Homogenized music, news and corporate programming dominate the consolidated media. "Public" radio is increasingly captive to other than the public interests. Community radio alone allows anyone a voice, and all an opportunity to hear a wide range of ideas, music and news...that help our democracy survive. There are those who would silence all voices but their own... I ask that you deny them this covert censorship and PROTECT LOW FREQUENCY FM!
